1. Description of router app

Router app *HTTP Login Banner* is not contained in the standard router firmware. Uploading of this router app is described in the Configuration manual (see Chapter [Related Documents](#)).

This module allows user to embed information banner ahead of the login form. Using this banner, it is possible to provide any information to user acceding to the router. Banner may serve as a notice describing the device or such as a warning of how to behave when configuring the router.

Figure 1: Information banner

For configuration *HTTP Login Banner* router app is available web interface, which is invoked by pressing the module name on the *Router apps* page of the router web interface. The left part of the web interface (ie. menu) contains only the *Return* item, which switches this web interface to the interface of the router.

2. Configuration

The actual configuration of the *HTTP Login Banner* router app configuration is performed via the form on the right of the web interface. The first item in the configuration form – *Enable HTTP Login Banner* – is used to activate this router app. Then it is necessary to insert text which will be displayed in the information banner to the *Banner Text* window. All changes in settings will be applied after pressing the *Apply* button.

Figure 2: Web interface

For displaying text correctly, it is not possible to use national characters!

3. Related Documents

You can obtain product-related documents on *Engineering Portal* at icr.advantech.cz address.

To get your router's *Quick Start Guide*, *User Manual*, *Configuration Manual*, or *Firmware* go to the [Router Models](#) page, find the required model, and switch to the *Manuals* or *Firmware* tab, respectively.

The *Router Apps* installation packages and manuals are available on the [Router Apps](#) page.

For the *Development Documents*, go to the [DevZone](#) page.
