- is empty*: SmartWorx HUB user module disabled,
- SWH: SmartWorx HUB user module enabled.

Description of Change

Detailed Description of Change: From effective date, the SmartFlex SR303 routers with P/N listed above, have homologation certificate for Brazil ANATEL under number 00176-19-05739. This homologation is required by the Brazilian Telecommunication Agency (Anatel) in order to be legally commercialized and used in the country. Routers with these certification will be made from the effective date.

Anticipated impact on Fit, Form and Function: There is no impact on the product itself. The only change for the product is on the labels – there is Anatel certification in the middle of the certification label as seen on the figure below. Related information are stated in the User Manual of the product as well.
