All related information, documents and binaries for the WebAccess/VPN application are available at <https://ep.advantech-bb.cz/products/software/webaccess-vpn> address.

Software details

- **Version: 1.1.2**
- **Release date: April 28, 2021**

Part I

Application Update Instructions

General Update Instruction and Notices

To check information about the application, including the version, go to *Application* menu located under the *Administration* section and check the *Application Information* box.

You can update the application on the same page as well. In the *Update WA/VPN Server* box click the *Choose File* button, choose a downloaded tarball file and click the *Update* button.

Part II

Changelog

Security Fixes

We have fixed possible SQL Injection vulnerabilities, increased the size of DH parameters to 2048 bits and hardened policies in *sudoers* file.

Added Support For Ubuntu 20.04

WebAccess/VPN can now be installed on Ubuntu 20.04.
